Tap the Power
of the Purest
Water in the
World.

THE AQUACLEAN SYSTEM

Pure Water Technology. Why Use Anything Else?

Aquaclean's Pure Water Technology turns ordinary tap water into the purest water in the world, creating a powerful cleaning agent that leaves surfaces spot free without water softeners or cleaning agents.

Stage 1. Tap water flows into the first Polypropylene filter which filters suspended solids to 5 microns.

Stage 2. 4 1/2" x 10" Granulated Activated Carbon/KDF Prefilter begins the anti-scaling process and removes chlorine in the water supply.

Stage 3. 3/4" diameter 5-10 GPM Anti-Scaling Device suspends calcium, causing scale not to stick to Reverse Osmosis Unit.

Stage 4. Reverse Osmosis Membrane separates water and removes 92% to 95% of total dissolved solids.

Stage 5. The De-Ionization Cartridge removes the remaining total dissolved solids, producing water that is 99.99% pure.

- 75% Faster Than Conventional Cleaning Methods – Increases Profitability
- Non-Electrical Fill Operation
- Eliminates Need to Find Water or Drag Hoses
- Ability to Quickly Purify Water on Site
- No Soaps or Chemicals, Environmentally Friendly
- Surface Dries Spot Free in Any Weather Condition – Even Direct Sunlight
- Cleans Glass, Frames, Awnings, Facades & Signs
- Self-Contained Pump Simultaneously Delivers Pure Water to Two Poles up to 300 Feet Apart
- Lightweight Interchangeable Cartridges are Easily Replaced and Maintained
- Lasts 10 Times Longer Than Standard DI Tanks
- Limited Warranty
- Customize System for Various Applications

TROLLEY MOUNTED SYSTEM

Aquaclean Advanced Pure Water Technology

Model #90006

5 Stage Water Treatment System Includes:

- 5 Micron Filter with 10" housing
- Carbon/KDF Pretreatment Filter with 10" housing
- Anti-Scaling Device
- RO Membrane with housing
- Polyethylene holding tank - 42 gallons
- De-Ionization Cartridge
- Hose reel with 150 ft of yellow hose each
- Frame - reflex blue powder coated
45" long x 30" wide x 46" high
- 12 volt switched pump

OPERATING SPECIFICATIONS

Space Requirements	45" long, 30" wide, 46" high
Weight (empty)	200 lbs.
Weight (full)	536 lbs.
Electrical Requirements	12VDC 60 AMP Battery (included) 115 VAC 6AMP Battery Charger (not included)
Tap Water Requirements	Minimum PSI 60 lbs. Maximum PSI 120 lbs.
Drainage	Drain near location (when Pure Water is being produced)

Systems pre-tested and ready to use.

Turnkey Package Also Includes:

	MODEL #	DESCRIPTION	MAX HEIGHT (ft.)	ACTUAL LENGTH (ft.)	WEIGHT (lbs.)
1 ea	92452 CFD	6-8' Sections, Carbon-Fiber	45	46	18
1 ea	92352 CFD	6-6' Sections, Carbon-Fiber	35	34	14
1 ea	91101 GFS	6-3' Sections, Fiberglass	10	9	4
1 ea	93012	Handheld Monitor			
3 ea	93008	DI Cartridge			
1 ea	T00124	18" Brush			
1 ea		Instructions/ Oper. Manual			

**All poles shipped with head and hose assembly.*

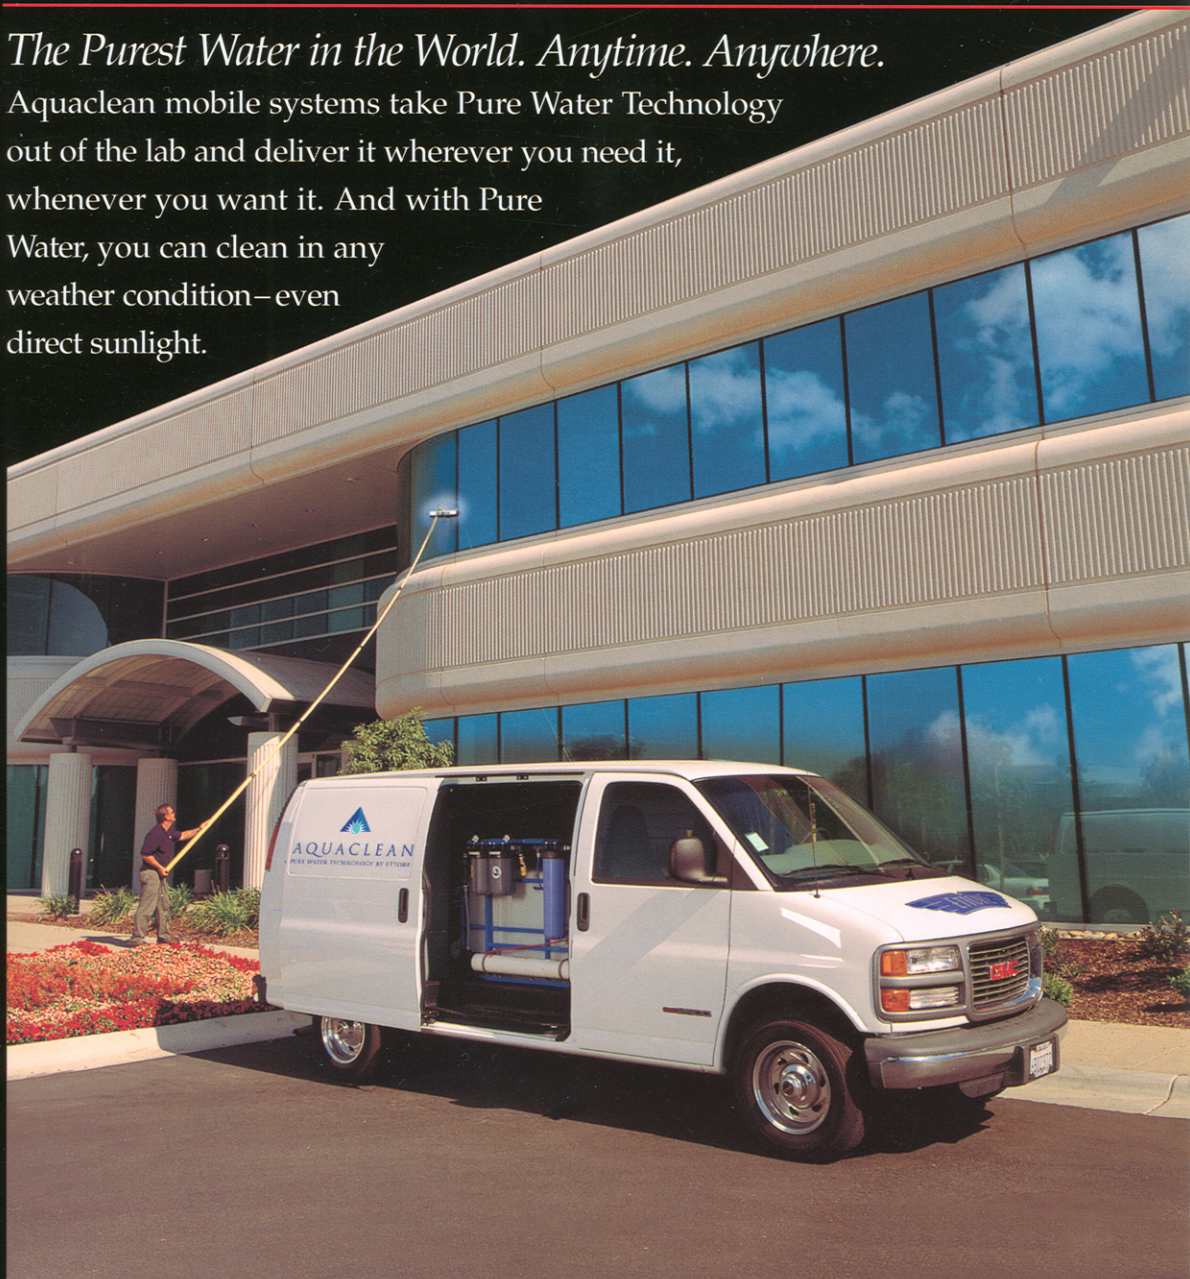

AQUACLEAN

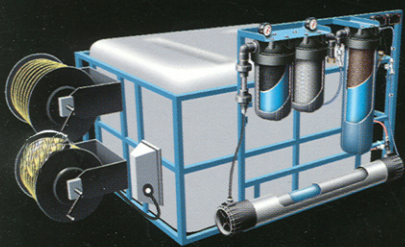

AQUACLEAN VAN MOUNTED SYSTEM

The Purest Water in the World. Anytime. Anywhere.

Aquaclean mobile systems take Pure Water Technology out of the lab and deliver it wherever you need it, whenever you want it. And with Pure Water, you can clean in any weather condition—even direct sunlight.

Aquaclean's state-of-the-art filtration system turns tap water into a powerful cleaning agent, eliminating the need for soap or chemicals.

Totally Self-Contained

No Need to Locate Water or Drag Hoses

Non-Electrical Fill Operation

Easy to Read Gauges for Quality Control

Interchangeable Filter System

200 Gallon Holding Tank

Low Maintenance

- 75% Faster Than Conventional Cleaning Methods – Increases Profitability
- Quickly Purifies Water on Site
- Turnkey Package Includes 3/4 Ton or 1 Ton GMC Savannah Van
- Installs In Any Vehicle That Meets Dimensional & Weight Limits
- Flexible Leasing Program

VAN MOUNTED SYSTEM

Aquaclean Advanced Pure Water Technology

Model #90007

5 Stage Water Treatment System Includes:

- 5 Micron Filter with 10" housing
- Carbon/KDF Pretreatment Filter with 10" housing
- Anti-Scaling Device
- RO Membrane with housing
- Polyethylene holding tank - 200 gallons
- De-Ionization Cartridge
- 2 hose reels with 150 ft of yellow hose each
- Frame - reflex blue powder coated
51" long x 40" wide x 37" high
- 12 volt switched pump

OPERATING SPECIFICATIONS

Space Requirements	51" long, 40" wide, 37" high
Weight (empty)	300 lbs.
Weight (full)	1900 lbs.
Electrical Requirements	Connected to vehicle's electrical system
Tap Water Requirements	Minimum PSI 60 lbs. Maximum PSI 120 lbs.
Drainage	Drain near location (when Pure Water is being produced)

Systems pre-tested and ready for installation.

Installation Requirements: Securing frame to vehicle and wiring pump to vehicle battery.

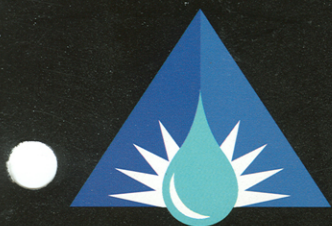

Turnkey Package Also Includes:

	MODEL #	DESCRIPTION	MAX HEIGHT (ft.)	ACTUAL LENGTH (ft.)	WEIGHT (lbs.)
1 ea	92452 CFD	6-8' Sections, Carbon-Fiber	45	46	18
1 ea	92352 CFD	6-6' Sections, Carbon-Fiber	35	34	14
1 ea	91101 GFS	6-3' Sections, Fiberglass	10	9	4
1 ea	93012	Handheld Monitor			
3 ea	93008	DI Cartridge			
1 ea	T00124	18" Brush			
1 ea		Instructions/ Oper. Manual			

**All poles shipped with head and hose assembly.*

AQUACLEAN

AQUACLEAN

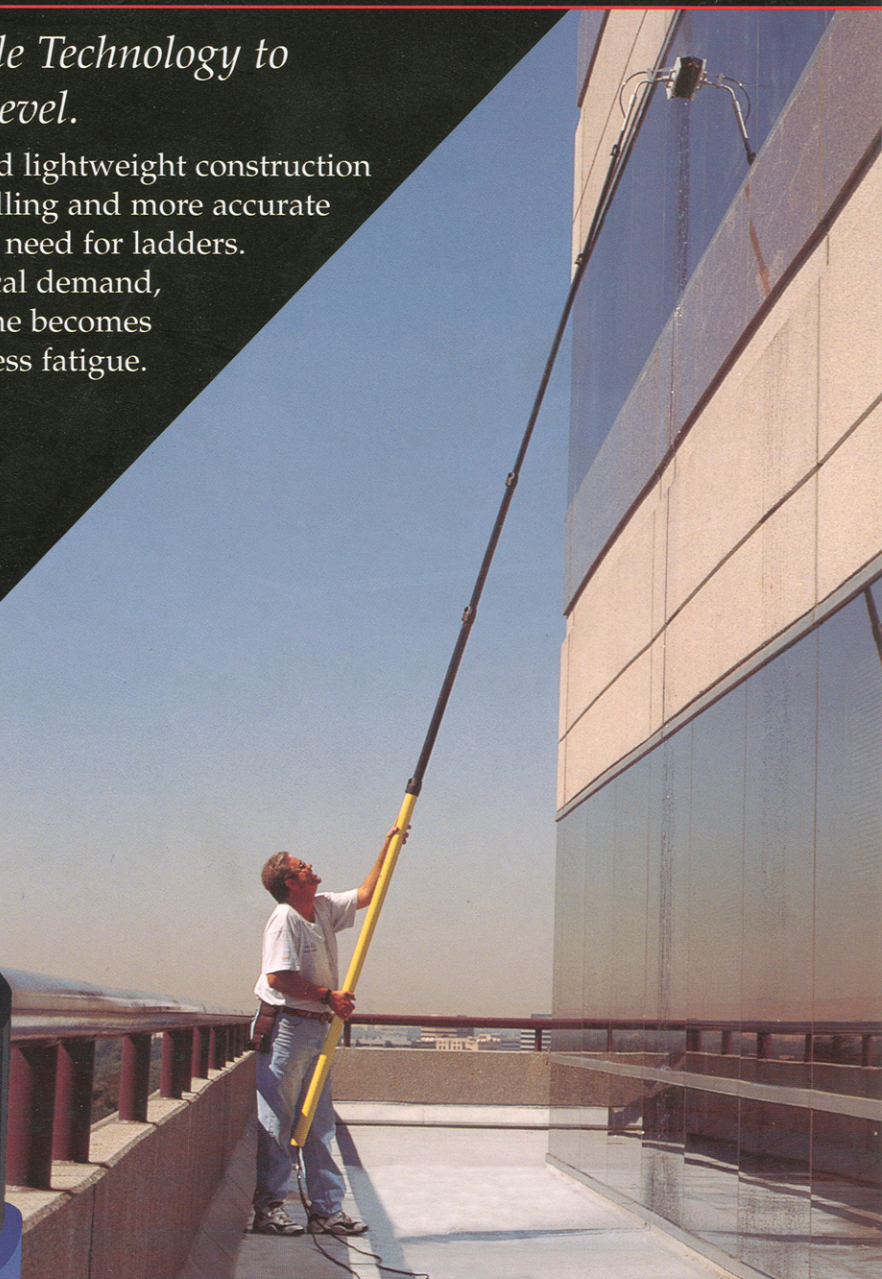

CARBON-FIBER POLES

*We've Taken Pole Technology to
A Whole New Level.*

Superior strength and lightweight construction allow for easier handling and more accurate cleaning without the need for ladders.

And with less physical demand, effective cleaning time becomes more efficient with less fatigue.

The Aquaclean Carbon-Fiber Pole is constructed of a Spun-fiber that is lighter and stiffer than conventional poles. And all Aquaclean poles feature quick-release finger tip clamping systems that eliminate the need for tools and ensure perfect locking force.

- 75% Faster Than Conventional Cleaning Methods – Increases Profitability
- 12% Lighter & 40% Stiffer Than Fiberglass
- Lightweight Pole Allows for Longer Cleaning Time with Less Fatigue
- Provides Accurate Cleaning Beyond 40' Without the Need for Ladders
- Durable Carbon Construction Won't Bend or Dent
- Finger Tip Clamping System, No Tools Required
- Comfortable in Cold Weather Conditions
- Includes Head Assembly & 12" Nylon Brush
- Limited 90 Day Parts & Labor Warranty

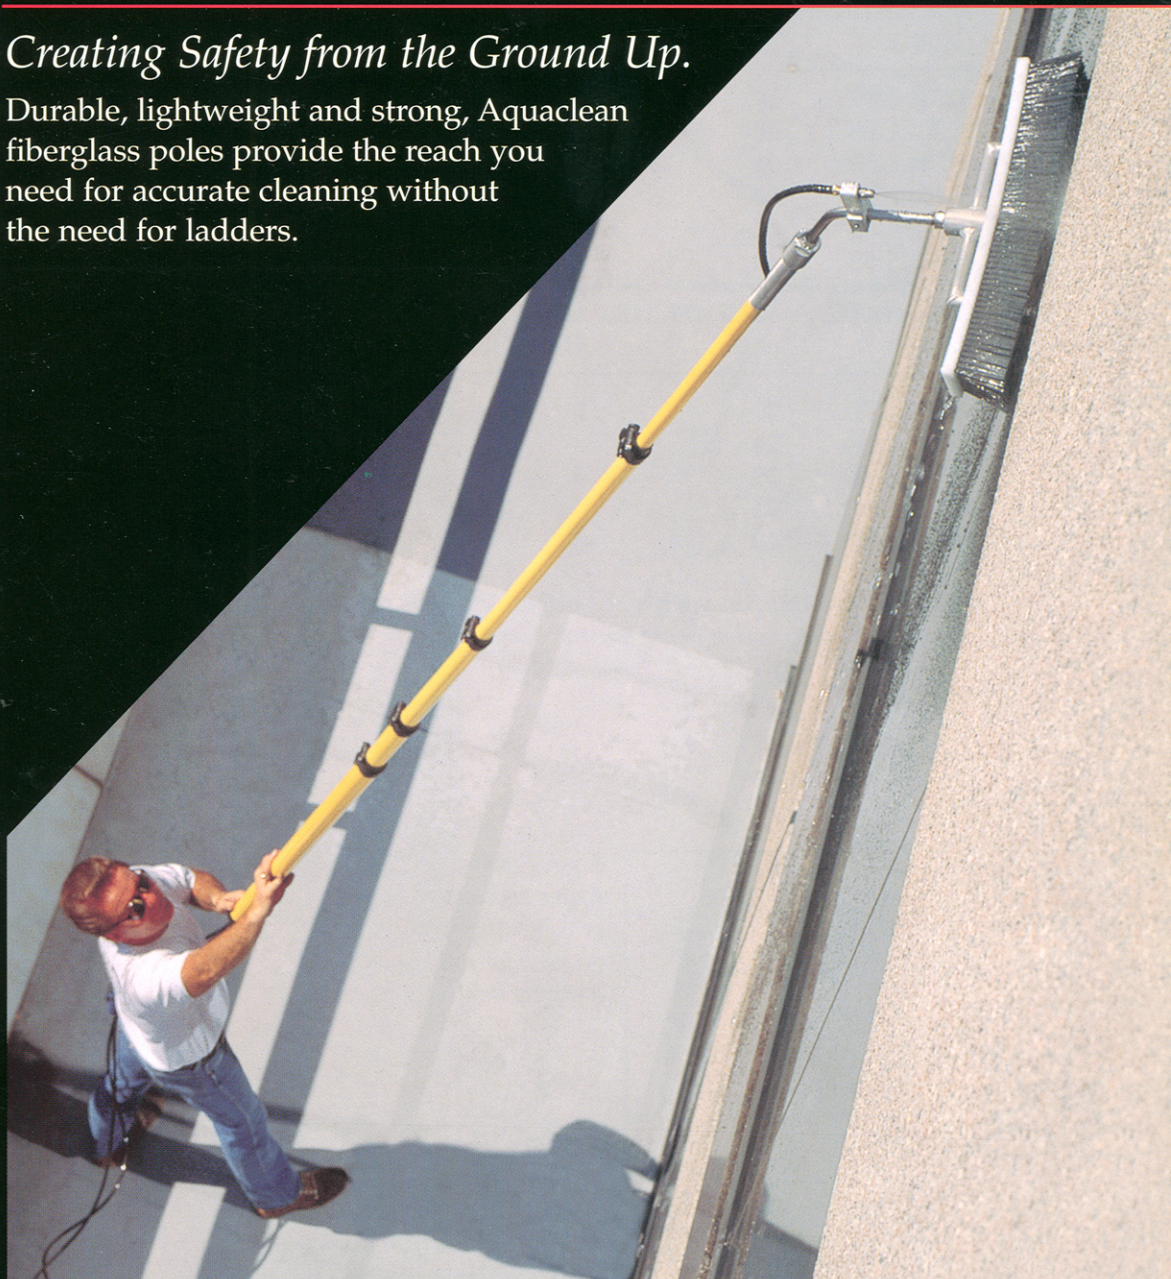

AQUACLEAN FIBERGLASS POLES

Creating Safety from the Ground Up.

Durable, lightweight and strong, Aquaclean fiberglass poles provide the reach you need for accurate cleaning without the need for ladders.

Aquaclean poles feature quick-release finger tip clamping systems that eliminate the need for tools and ensure perfect locking force.

- 75% Faster Than Conventional Cleaning Methods – Increases Profitability
- Extended Reach Eliminates the Need for Ladders
- Durable Fiberglass Construction Won't Bend or Dent
- Finger Tip Clamping System, No Tools Required
- Comfortable in Cold Weather Conditions
- Includes Head Assembly & 12" Nylon Brush

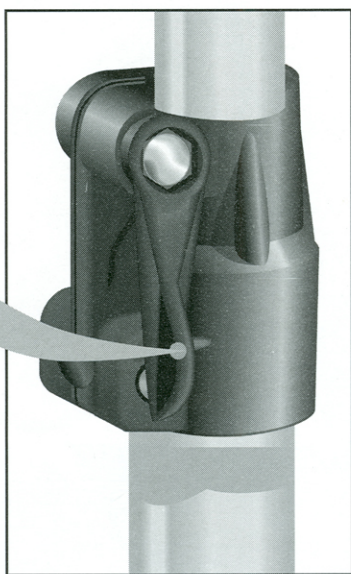

FIBERGLASS COMPOSITE POLES

Aquaclean Advanced Pure Water Technology

SINGLE HOSE (Model #)	MAX HEIGHT (ft.)	NUMBER OF SECTIONS	SECTION LENGTHS (ft.)	WEIGHT (lbs.)
91101 GFS	10	3	3	4
91201 GFS	20	5	4	8
91241 GFS	24	3	8	9
91301 GFS	30	5	6	11
91321 GFS	32	4	8	12
91401 GFS	40	5	8	15
DUAL HOSE (Model #)	MAX HEIGHT (ft.)	NUMBER OF SECTIONS	SECTION LENGTHS (ft.)	WEIGHT (lbs.)
91202 GFD	20	5	4	9
91242 GFD	24	3	8	10
91302 GFD	30	5	6	12
91322 GFD	32	3	8	13
91402 GFD	40	5	8	15

All poles are shipped with a 12" brush. 18" brush can be substituted.

As with all poles, extreme care must be taken while working near water and electricity.

*Simply swing quick-release
finger tip clamp to extend
or contract pole. And there's
no need for tools to ensure
a perfect locking force.*
