Clean Effectively With 98% Less Labor

aec01-1

Hands free, automatic cleaning eliminates manual, labor intensive work.

Ease of mobility adds to effortless cleaning and fast set-up and take-down.

Recommended by escalator manufacturers

CleanMaster's self-contained, compact unit cleans and polishes unsightly stair treads... EFFORTLESSLY! Automatically, TreadMaster removes stains and dirt, and eliminates manual cleaning of escalator treads. Simply position TreadMaster at the bottom of the escalator, lower the tread-wide cleaning head into position and activate the escalator. Without any repositioning during any part of the cleaning process, TreadMaster cleans any tread width completely and thoroughly.

TreadMaster is efficient

The ease of set-up and take-down makes cleaning escalator treads a "hands-off" job. TreadMaster frees up personnel to perform other tasks while TreadMaster is at work. The built-in vacuum system, easily replaceable, heavy duty polishing pad and Nylon-Grit brush guarantees complete and thorough cleaning.

Escalator Tread Spot Cleaner

CleanMaster's Escalator Tread Spot Cleaner is an excellent product to use in conjunction with the TreadMaster. This fast acting spot cleaner is designed specially for use on aluminum escalator steps. This solvent is non-flammable and non-conductive so it can be used while motors and equipment are operating.

TreadMaster is safe

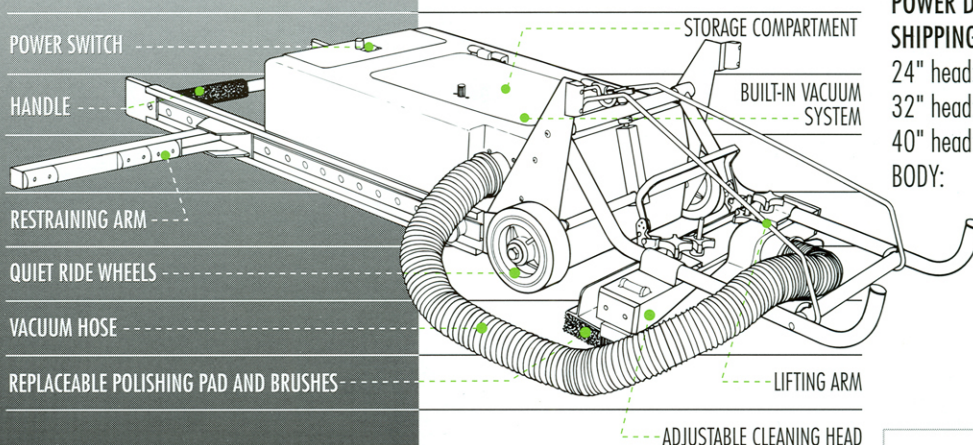

One-step, automatic cleaning eliminates risky, manual cleaning procedures. TreadMaster removes unsafe substances from stair tread surfaces, reducing the risk of liability hazards for customers and employees. Comes with handy clip-on "out of service" sign to deter escalator passengers.

Features

DURABLE, roto-molded construction
